LINES

Visible edge

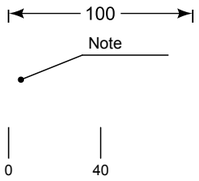

Hidden edge
(behind a surface)

Thin line: extension, leader,
table and detail circle

Section: material cut through
by a section view; hatch angle
alternates between parts

DIMENSIONS & NOTES

Dimension in mm. The number is
the TRUE size, whatever the scale

Note with leader: the dot sits
on the feature it describes

Ordinate positions: measured
from the 0 edge named beside it

SCALE & UNITS

All dimensions in millimetres (mm).
1:5 = the drawing is 1/5 of real size. Each view states its scale.
Do not measure the paper - always build from the dimensions.

IDENTIFIERS (red = an ID you can look up)

Part Label balloon. Same letter in the
CUT LIST and marked on the real part

▲ A

Part Label mark, written on the part's
inside face. The ▲ points UP

H1

Hardware ID - see the HARDWARE table
(H1 = Confirmat 7x50, H2 = back screw)

Filled dot (assembly sheets):
a screw installed at this point

Open circles (part sheets): a hole to
drill; its size is in the hole note

J1

Jig ID - a 3D-printed drilling or
marking jig (separate print files)

Detail circle: this area is drawn larger
as DETAIL 1 on the same sheet

1

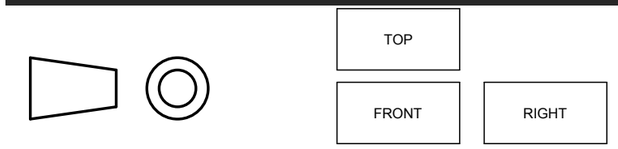

Step badge: do the SEQUENCE steps
in order; IDs in a step are red

QR code (title block): opens the
interactive 3D model of that assembly

HOLE & SIZE NOTATION

SYMBOL	MEANING	EXAMPLE
Ø	diameter	Ø7 = 7 mm hole
THRU	all the way through	Ø7 THRU
DP	depth of a hole	Ø5 x 45 DP
CSK	countersink (cone)	CSK Ø10 x 90°
W x D	width x depth of a cut	dado 18 W x 6 D
L / W / T	length (grain) / width / thick.	cut list
QTY	quantity	
or eq.	or an equivalent part	

PROJECTION

Third-angle projection: each view sits on the side it is seen from
(TOP above FRONT, RIGHT SIDE to the right of FRONT).

TERMS

Dado	groove cut across a panel that another panel seats in
Rabbet	step cut along a panel edge
Confirmat	one-piece cabinet screw; needs a stepped Ø5/Ø7 hole
Pilot hole	small hole the screw threads into
Countersink	cone at the hole mouth so the head sits flush
Inside face	the face that ends up inside the Cabinet

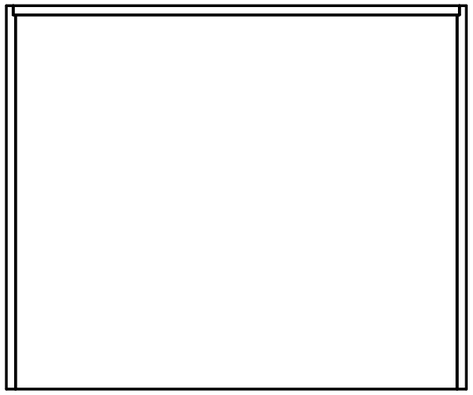

All dimensions in mm. Third-angle projection. PLACEHOLDER DIMENSIONS — prototype sheet.

FRONT

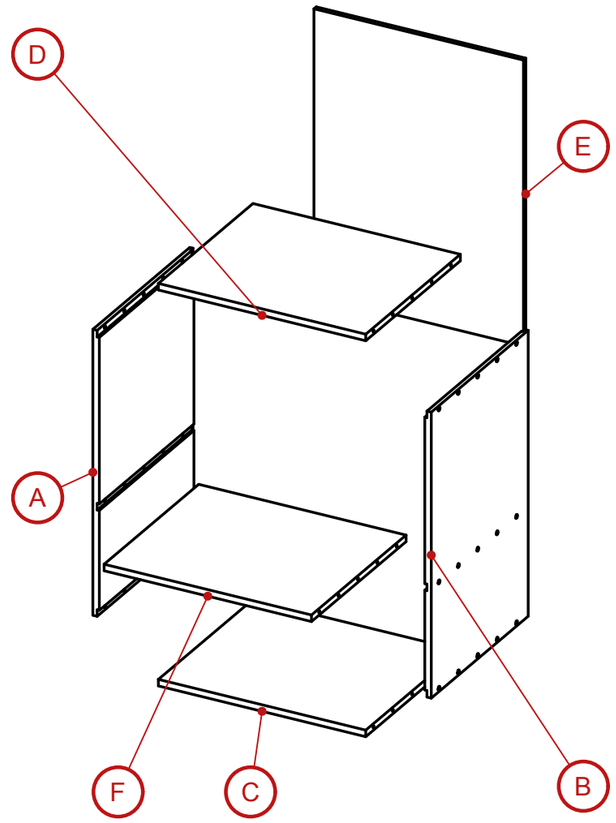

RIGHT SIDE

ASSEMBLY SEQUENCE

1. Machine dados, rabbets and Ø7 holes in A and B (sheet 3), drilling with jig J1.
2. Drill Ø5 x 45 pilots in both ends of C, D and F with jig J2.
3. Stand A on its front edge. Seat C, F and D in their joints and drive H1.
4. Lower B onto C, F and D; drive H1. Check both diagonals are equal.
5. Slide E down the back rabbets and fix it to C, D and F with H2.

All dimensions in mm. Third-angle projection. PLACEHOLDER DIMENSIONS — prototype sheet.

EXPLODED VIEW (1:15)

CUT LIST (mm, L = grain direction)

LBL	PART	QTY	L	W	T	MATERIAL
A	Side, left	1	785	500	18	18 ply
B	Side, right	1	785	500	18	18 ply
C	Bottom	1	576	488	18	18 ply
D	Top	1	576	488	18	18 ply
E	Back	1	785	582	12	12 ply
F	Shelf, instrument bay	1	576	488	18	18 ply

HARDWARE

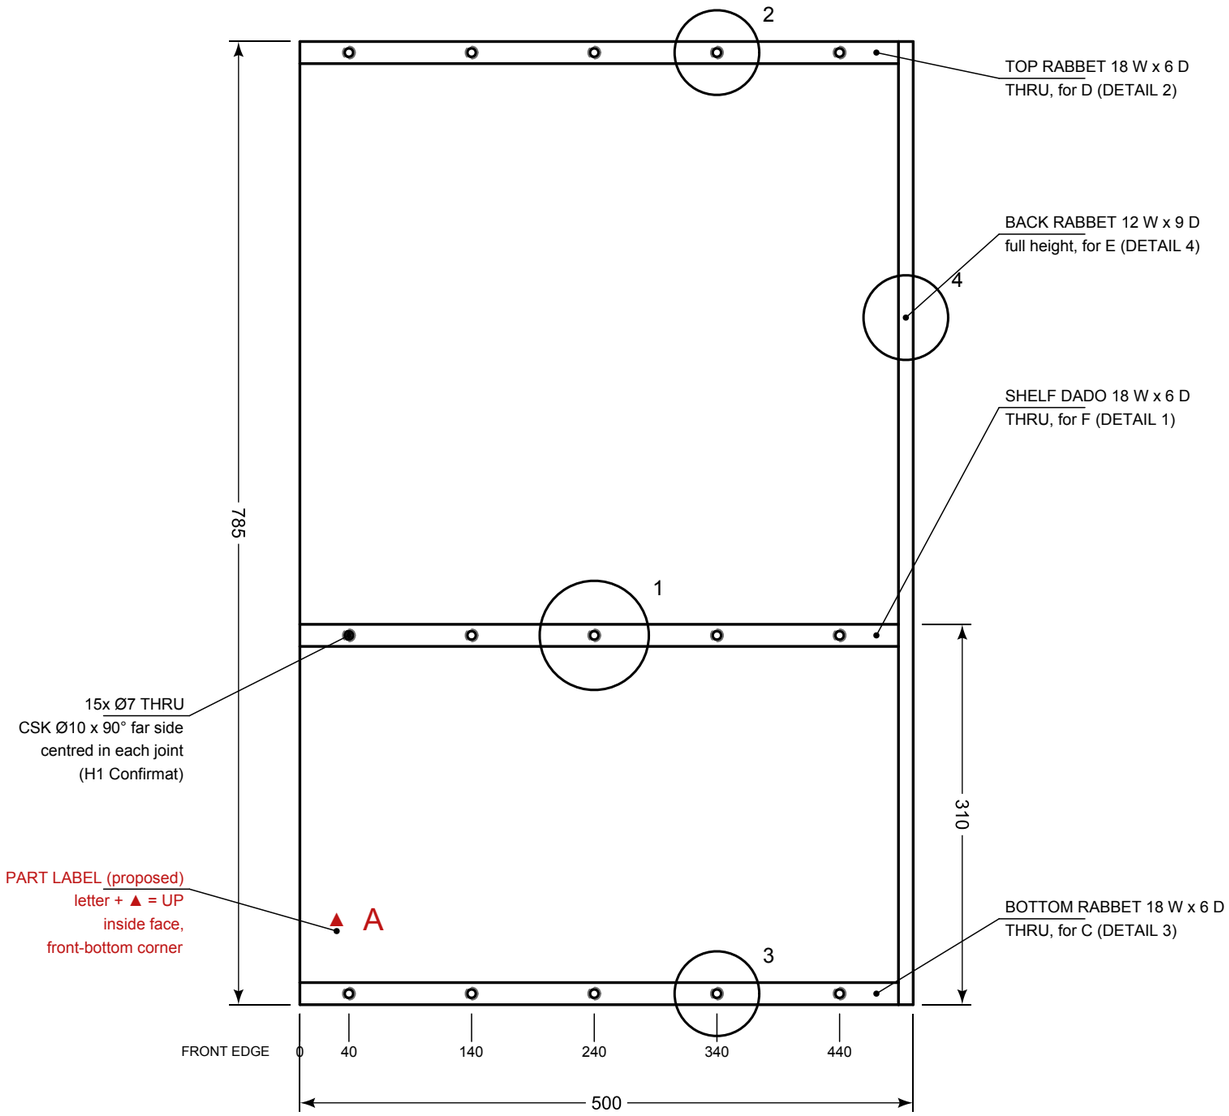

ID	HARDWARE	QTY	DRILL
H1	Confirmat screw 7x50 (Hafele 264.42.193 or eq.)	30	Step drill Ø5/Ø7 + csk
H2	Pan-head screw 4x16, back to C/D/F	18	Pilot Ø2.5

INSIDE FACE (1:5)

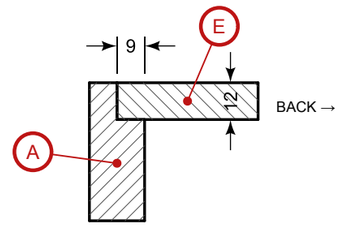

DETAIL 1 — SHELF DADO (1:2)

DETAIL 2 — TOP RABBET (1:2)

DETAIL 3 — BOTTOM RABBET (1:2)

DETAIL 4 — BACK RABBET, PLAN (1:2)

MACHINING SEQUENCE

1. Rip and crosscut to 785 x 500. Mark the Part Label A on the inside face (front-bottom corner).
2. Cut the top and bottom rabbets and the shelf dado: dado stack 18 wide, 6 deep (details 1, 2, 3).
3. Cut the back rabbet 12 x 9 along the rear edge, full height (detail 4).
4. Drill the 15 holes from the inside face with jig J1, which registers in the dado and rabbets; countersink from the outside face.

HARDWARE (this part)

ID	HARDWARE	QTY	DRILL
H1	Confirmat screw 7x50 (Hafele 264.42.193 or eq.)	30	Step drill Ø5/Ø7 + csk
